

SYMQUEST TONER RECYCLING

Recycle your toner with SymQuest.

Join the Clean Planet Program today!

SymQuest strives to keep our planet clean. One out of every three packages we ship is sent in a reused cardboard box, and on average we recycle two tons of waste cardboard per week through the Chittenden Solid Waste District. We have also made a significant effort to source and market recycled toner cartridges. 84% of our toner cartridges sold annually are made from recycled materials. And, 95% of cartridges we sell are returned to a recycling center by our clients.

Beyond these efforts, we have championed the issue on a national scale and SymQuest has aligned with Konica Minolta to bring you a comprehensive recycling program.

Welcome to the Clean Planet Program

Konica Minolta's Clean Planet Program leads the industry in protecting the environment. Now, we're taking another step forward by simplifying our program to make it even easier and more convenient. Saving energy, managing resources and promoting policies that really make a difference -- it's all part of our commitment to preserve the planet for generations to come.

What to expect from the Clean Planet Program:

- **Streamlined order processing:** Log in with your customer ID and zip code to order boxes -- no need to re-enter all of your information.
- **One stop recycling:** All of your consumables,

including toner cartridges, imaging units, waste toner bottles, developer units, drums, etc., can be placed into a mid-range collection box or large gaylord. Note: All brands of consumables can be included with your Konica Minolta material in mid-range collection boxes or gaylords.

- **Pre-labeled UPS boxes:** If you choose our "Box Program" your boxes come pre-labeled with UPS return information. When a box is full, simply schedule a pick-up.
- **Online ordering and tracking:** You can see the tracking number for all requested collection box kits and track the package via UPS so you know when your materials will arrive.
- **Online reporting:** Monthly environmental reporting will show weight and units returned from your location.
- **Online label printing:** Single Label Program returns will allow for online printing of UPS labels.
- **Online ordering:** Enables pick-up for high-volume "Gaylord Program".

Clean Planet Overview

Clean Planet offers multiple programs to return consumables for ease of use. To lessen the environmental impact of shipping, we encourage you to select the program that most closely meets your monthly usage of cartridges and bottles.

Small and home office customers: "Single Label Program"

The Single Label Program is intended for customers who use 3 or less consumables per month. This program allows single items to be easily returned for recycling. Simply package your used consumable in your new consumable box, affix the UPS label ordered from the website, and ship. Individual UPS labels are printed through the Clean Planet website.

Mid-sized customers: "Box Program"

The Box Program is ideal for customers who utilize between 4 and 200 cartridges per month. Each order includes 3 individual recycling boxes that are designed to hold 10 to 15 items (when placed into the recycling box without the original packaging). The boxes come complete with pre-affixed return UPS labels. When a box is full, simply secure the liner with the included zip ties, tape the lid, and schedule a pick up through UPS.

High-volume customers: "Gaylord Program"

The Gaylord Program is specifically for customers who use a large volume of consumables each month (greater than 200 pieces) and have the space to use a 4' by 4' by 4' gaylord. Konica Minolta can arrange for the delivery and pickup of recycling pallets that hold a larger quantity of consumable items. Customers who lack the space can utilize the box program instead. Material should be placed into the lined gaylord without any original packing. To schedule a pick-up, contact us. Please note: gaylord kits are

shipped via tractor-trailer and are roughly a 4' by 8' footprint on a single skid. Gaylords, liners, and lids are provided; however, the skids needed for return are not provided.
